

Vincentian CMS 3.0 Pricing

Agular Vincentian Case Management System 3.0

The Agular Vincentian Case Management System is an affordably priced solution for conferences looking to deploy a cloud based scalable solution for managing the details for those they serve. Pricing is broken into 2 tiers giving a discount to Diocese with a larger installed footprint.

Pricing is \$300 per year per conference and is renewed annually.

Conference setup and configuration is a **\$75 one time charge**.
Simple client data migration is optional and costs are negotiable based on the effort involved.
Online training sessions can be purchased as desired.

The Agular Vincentian CMS includes:

- Automated Production of SVDP USA standard reporting
- Outreach Center Support (billed as a conference installation)
- Centralized Intake Support (billed as a conference installation)
- Optional Workflows such as Imaged Document capture and Case Management role oversight.
- Detailed reporting including demographics and volunteer effort tracking.
- Standard Program Support (a non-customized set of program support that is growing as more are added - a new feature so growing this list is a current developmental priority.)
- Additional Custom Program Support (diocese or local/regional efforts such as Pharmacies, Mattress Programs, Unique Special Works efforts or specific EFSP workflows)

Agular CMS Lite

For the last year Agular have been working closely with Diocese in the San Francisco Bay area to develop a simplified version of CMS built around the limited concepts of single page data entry and abbreviated case flow. This product offering is significantly less powerful than CMS - but it is tailored for small conferences that perform a limited number of home visits and for those looking for a system that will ease members into the basics of information management.

Agular has been in talks with entities willing to financially support this effort that would make this free of charge if there is enough demonstrable interest from Vincentian conferences. If interest is limited then Agular has committed to offer the product at a price that simply offsets our costs. The target general release for CMS Lite is February 2018. If you have interest please contact us and let us know so we can determine if this is something we will be able to make available for free.

- Cross Conference Client data pooling
- Client Identification
- Treasury Functionality
- Program Support
- Detailed Reporting
- Training and Support
- Diocese Level Reporting

CMS

Advanced

CMS Lite

Simple

Limitations:

- As CMS Lite does not support Programs and Program Support is key to the Outreach Center design, Lite cannot be used for these facilities.
- At least 3 conferences using the Agular product (whether lite or not) must express interest.
- Council or District leadership available to apply for the free of charge license
- Membership able to train non subscribed conference on the use of CMS Lite
- Centralized Referral pushing cases towards CMS lite conferences is only available if regular CMS is also deployed at the Diocese.
